

Serial No. 10/760,448

In the Specification:

Please amend the specification in the paragraph starting at page 7, line 3 as follows:

A respective one of a pair of elongated pad contacts 440 respectively supports the respective L-shaped member 432, 438 of the decoupling capacitor 406, 408. SMD package 500 includes a generally rectangular enclosure 502, a pair of outer contact pads 504, and a first and second pair of inner contact pads 506, and 508. FIG. 4 shows the internal configuration including the six pad contacts 412, 418, 440 for mating engagement with respective pairs of pad contacts 504, 506, 508 of the SMD package 500, as shown in FIG. 5.
